Announcing the launch of Minesoft Patent Viewer

- The foolproof way to organise, manage and examine your patent portfolio

Minesoft Patent Viewer is a patent document management system with a special toolset for viewing documents.

It enables individuals, departments or whole companies to organise their patent portfolio into Folders and Work Files.

Viewing and examining lengthy patent specifications is made easy with the Minesoft Patent Viewer. Bookmarked PDF documents and hyperlinks to bibliographic and full text information are displayed in a split screen mode, making comparisons of text and navigation through documents simple.

Links to INPADOC patent family and legal status information and an "Add notes" feature are provided. An "Export" option allows for distribution to a wider audience if necessary.

Integrated tools, such as ranking documents by relevance and grouping keywords by colour highlighting make it really easy to identify relevant documents and pertinent keywords.

The Minesoft Patent Viewer is recommended for anyone managing or examining patent documentation. 24/7 secure accessibility via URL means that set up and maintenance are simple and safe, while one fixed annual fee offers budget control.

Minesoft Patent Viewer is available for demo. If you are interested in the Minesoft Patent Viewer and would like further information or a demo then please email: info@minesoft.com

Minesoft Ltd is recognised for its delivery of intellectual property solutions and self-explanatory user interfaces. Its clients are leading corporations, worldwide, for whom it provides specially tailored services and customised products at the forefront of today's patent information market.
