PatentArchive

## Alert Management Solutions

*In today's fast moving technological environments it pays to keep your researchers in tune with the latest technologies being developed by your competitors.*

*PatentArchive is a comprehensive solution based around a suite of products:*

**PatBase**  
**PatentOrder**  
**PatentArchive**  
**Patent Family Portal**  
**PatentViewer**

This solution has developed gradually as a result of experience gained working closely with large corporations. In a nutshell, companies can manage the influx of new and existing patent applications published around the world, in order to categorise and distribute relevant information and offer a searchable patent resource.

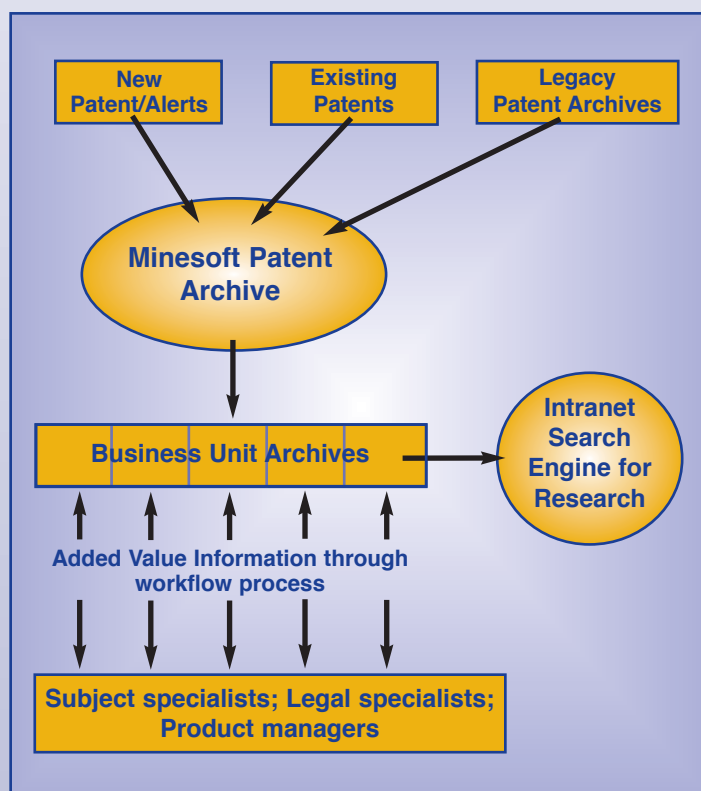

### **Publish Your Own Patent Database**

PatentArchive creates a valuable internal patent asset containing selected data in your chosen field, enhanced by your in-house specialists through the application of relevant keywords, categories, notes and accompanying documents.

Selected information is re-distributed to researchers and product developers to be kept aware of current developments in their field of activity.

Used by:

- **Manufacturing Companies**
- **R&D Departments**
- **Legal and Patent Departments**
- **Research Organisations**

PatentArchive

Discover and evaluate new markets by leveraging the current patent landscape with your own in-house expertise, using Minesoft's Alert Management Solutions:

- Develop multiple Patent Archives for different business units
- Capture advances in your field of technology using integrated Alert Management
- Distribute information internally
- Enhance the information in a structured way
- Archive permanently, updated via the unique Minesoft architecture
- Adapt information workflow to suit your company structure
- Ensure future compatibility by using XML standards

Store evaluations for future use  
 Create greater patent awareness within the company  
 Simplify patent information for non-patent professionals  
 Effectively monitor and track competitor patent portfolios  
 Analyse technologies with tailored mapping tools  
 Move multiple internal patent databases onto a single platform
