Patent Tracker

## Patent Tracker Alerts

### *The most comprehensive patent family and legal status automatic monitoring service*

Patent Tracker monitors the respected INPADOC and Legal Status service from the EPO, US PAIR and epoline® as well as a variety of detailed national Patent Office registers, covering legal status from more than 45 countries and family information from over 75.

Just one, or hundreds of patent applications, can be watched by PatentTracker. Fully maintained and hosted, there is no need to be a software expert or load software locally. Each client has their own archive that may be viewed anytime, providing a useful backup facility for peace of mind.

- Easy to use
- Detects every change
- All changes are clearly highlighted
- Option to track selected events
- Select weekly or monthly reports
- Alerts delivered by email
- Cost-effective, with one annual flat fee

Monitor patent applications up to Patent Grant – and beyond

Patent Tracker

Bibliographic and procedural data watched includes:

- INPADOC patent families
- INPADOC legal status
- US PAIR
- epoline®
- German Register
- British Register
- Canadian Register

- Range of user options
- Uploading of lists possible
- Individual or grouped reporting
- Management features included
- Personal Archive provided as back-up

MultiTracker – choose a MultiTracker Alert and watch all Patent Tracker data: multiple sources are watched for the price of one alert, ensuring highly cost-effective and efficient monitoring, while saving hours of time and providing a broad international watch on patent applications.

Contact Minesoft or your local representative for further information, sample reports and estimates. High numbers of cases to be monitored attract special pricing.
