PatBase Express is an ideal service for searching patent information broadly throughout an organisation, designed for engineers, chemists, R&D and Business Analysts.

Available for unlimited use by a single user, a group of users or as an Intranet service, **PatBase Express** draws on the entire original PatBase data, comprising 37 million patent families and over 20 million searchable full-text patent specifications and 3 million machine translations.

PatBase Express offers:

- A simple and intuitive way of investigating patents by subject, competitor or number
- Patent documents, already grouped into inventions, avoiding duplicated information and saving time
- A suite of in-built search aids and tools, assisting users to locate the right information
- Multi-lingual user interface

- Fast scanning through results for rapid identification of interesting documents
- Easy navigation and browsing through patent documents, including technical diagrams and chemical structures
- Further research and examination of selected relevant patents
- Display of original documents and access to legal data, for added convenience
- Multi-lingual data with built-in machine translation toolset
- Over 5 million non-Latin full-text

Used in combination, PatBase products offer a comprehensive solution for corporate IP information needs.

PatBase Express search tools include smart software and algorithms for identifying patents of relevance based on keyword entries, locating documents by a single number, claims analysis and more, providing an easy-to-use and convenient solution.
