

## Take the hassle out of monitoring patent applications

Eliminates the need for time consuming manual checks

Easy to use interface with in-built management features

Just one, or hundreds of patent applications can be reliably watched by Patenttracker. Fully maintained and hosted by Minesoft, each client has a personal archive providing a useful back-up facility for peace of mind.

Multi Tracker alert  
- watch multiple registers for price of ONE alert

Option to track only selected events on EPO register

Select weekly or monthly reports - with individual or grouped reporting

Patenttracker monitors the respected INPADOC and Legal Status service from the EPO (epoline®), the USPTO's US PAIR and a variety of important national Patent Office registers, covering legal status from more than 50 countries and patent family information from over 75.
