

BizInt announces Version 3.3 of BizInt Smart Charts for Patents, which will add support to Minesoft PatentOrder, for delivery of patent copies in PDF format, Oct 5, 2007

BizInt Smart Charts for Patents Version 3.2, an interim version, added compatibility for PatBase (developed by Minesoft and RWS), so that searches can be performed in PatBase and exported into BizInt Smart Chart for Patents for further post processing.

The BizInt Smart Charts post-processing tool creates tabular reports quickly, including a host of options to manipulate and analyse data further. Tables, records and images may be viewed, customised, printed or exported (to html, word, excel and other formats). In addition, a range of statistics can be generated from the PatBase report, for subsequent graphical analysis. For further information and pricing options, please contact info@minesoft.com or BizInt Solutions at info@bizcharts.com.

About Minesoft

Minesoft (www.minesoft.com), founded in London in 1996, has become recognized as a leading name in the patent information world, known for its user-friendly, robust and efficient patent search, workflow and delivery tools. Minesoft's flagship product, PatBase, jointly developed with RWS Group, a leading public Intellectual Property search and translation company headquartered in the UK, is the largest single patent database in existence built by patent search professionals for patent search professionals with the fundamental premise of increasing efficiency and accuracy by searching full-text and classifications of extended patent family data. Recently Minesoft developed PatentArchive, a knowledge workflow tool designed to capture, document and archive the technological expertise of technologists.

About BizInt
