Minesoft partners with Gridlogics to launch an integrated IP analytics platform “Minesoft iNSIGHT Pro” to its customers

March 2, 2010, London, UK – Minesoft, a fast growing patent database and archive solutions provider and Gridlogics, the patent analytics company behind Patent iNSIGHT Pro, announced that they have partnered to launch an integrated analytics solution for Minesoft customers. The integrated solution, Minesoft iNSIGHT Pro, combines the powerful analytics and visualisation capabilities of Patent iNSIGHT Pro with real-time integration and retrieval of patent information and saved portfolios.

Under the terms of the agreement, Minesoft will offer the integrated solution Minesoft iNSIGHT Pro to their customers. Minesoft iNSIGHT Pro will be available in three editions: Desktop, Enterprise and SaaS to cater to individuals and large organisations alike. The solution will allow users to move their online portfolios into the platform and proceed with analyzing the data to map trends, locate hidden relationships and uncover gaps and opportunities.

Minesoft iNSIGHT Pro permits users to directly search and import results from the software. Further, users can lookup latest content on PatBase in real-time and automatically update their local data such as families and citations. Users save time integrating patent content and can easily replicate their online portfolios into the analytics platform.

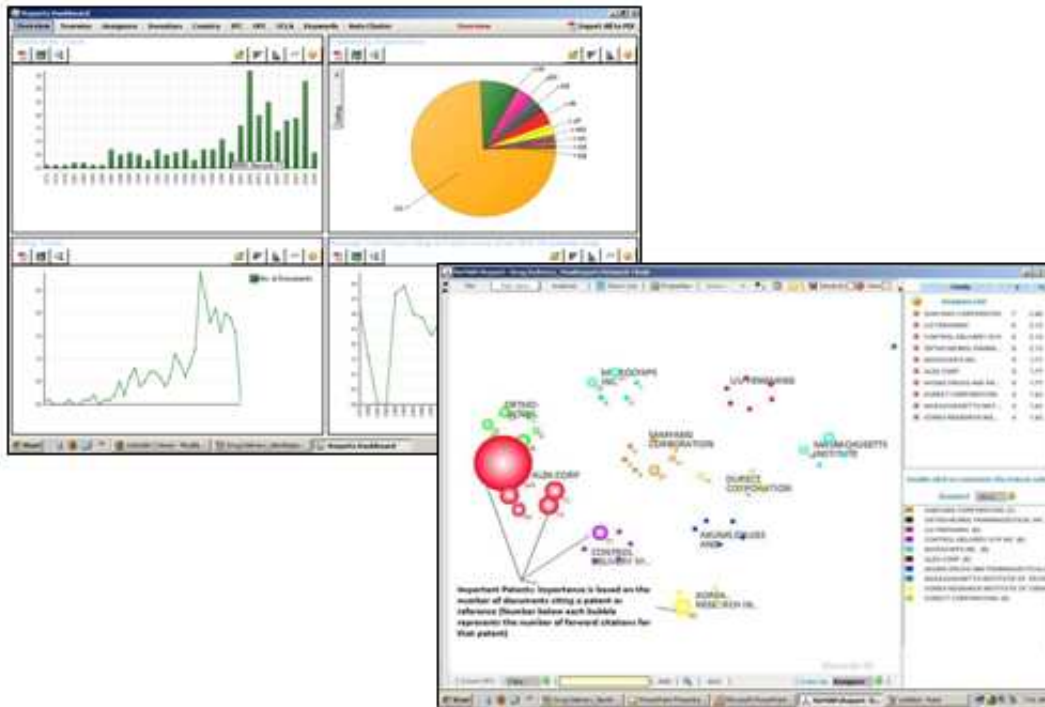

The representation allows Minesoft to provide end-to-end patent research and analysis solutions across the globe and complements their existing patent information product line.

“We are pleased that Minesoft has chosen our product to integrate into their current offering and thereby offer a more powerful and complete solution to their fast increasing base of users globally. We are confident that the combination of Minesoft iNSIGHT Pro and PatBase offers a very powerful and yet cost-effective full-integrated IP research and analysis solution to patent professionals and allow them to take on more in-depth analysis in less time with ease.” said Manish Sinha, Director, Gridlogics.

“With the increasing volumes of patents, patent information professionals constantly are seeking ways and means to analyse and represent the information in concise and visually powerful ways. We chose their existing solution Patent iNSIGHT Pro to integrate with our products, for its powerful text-based analytics and visualisation capabilities, growing market acceptance, flexible delivery models, and their strong customer support structure built up over the last 3 years. The integrated solution, Minesoft iNSIGHT Pro, will allow our users to conduct powerful analytics on the rich content available from PatBase and cut the time to extract the answers to their questions.” said Ann Chapman, Director, Minesoft. “We are excited to build upon our existing relationship with Gridlogics and to offer this powerful analytics platform to our customers globally.”
