

Minesoft and Tempus IP are proud to announce a new, cost-effective, internet service delivering file histories, NPL and certified IP documents

Washington and London, 15 September, 2008:

Minesoft, provider of the well-known PatentOrder document delivery service and Tempus IP announce a new Internet-based full service co-operation. Tempus IP will deliver patent file histories (also known as "file wrappers"), non-patent literature cited in patent documents and a wide range of certified IP documents from the USPTO and international Patent Offices around the world.

The interactive Tempus IP website developed by Minesoft allows clients to place and track orders 24 hours a day. Experienced advisors are available by telephone, email or fax to assist clients at all stages. Well-located to take advantage of USPTO document resources and with established contacts to other major IP centres and providers, Minesoft and Tempus IP offer a flexible, easy-to-use intellectual property document ordering service that can be used by corporations to locate and deliver a wide range of IP documents in the patent, trademark and copyright sectors.

Tempus IP will distribute Minesoft's PatentOrder service, delivering copies of original patent documents from around the world. Further integration and customization of document delivery is expected.
